2.1 AP MODULES

Part Number	Description
C054045A001A	PMP 450 Connectorized Access Point
C054045A002A	PMP 450 Connectorized Access Point, US only

Each AP can provide a specific sector size or area of coverage. PMP 450 APs are connectorized radios and can support any coverage you need. However, we recommend using the AP with the high-performance antennas that have been developed specifically for the PMP 450 product – either a 8-sector dual mode (both FSK and OFDM) or a 4-sector OFDM antenna. Your individual network and configuration may require a different sector width. If alternative configurations are needed, be sure that local regulations are followed prior to purchase.

Note that the N-type to N-type cable required to connect the AP to the antenna is not included and must be purchased separately. For an OFDM-only deployment, you will need two cables, one for the horizontal and one for the vertical OFDM polarities. If you are deploying in the Combo mode (i.e., serving both FSK and OFDM subscribers), you will need three of these cables. Each antenna is supplied with a bracket for mounting to a pole that is 2 inches (50 mm) to 3 inches (75 mm) in diameter.

Part Number	Description
85009324001	90 Degree Sector Antenna (H+V OFDM inputs)
85009325001	60 Degree Sector Antenna (H+V OFDM, FSK input)
30009406002	N-type to N-type Cable (16 inch length)

rural broadband deployments, SCADA and sensor data backhaul, and even video surveillance applications. Available as Subscriber Module or Access Point. Download Spec Sheet PMP 450 – High Performance and Synchronization for Access and Backhaul The Cambium Networks 450 leads the wireless access network platform industry. Available in Point-to-Multipoint and Point-to-Point options, the 450 platform is optimized for rate, reach, reliability and throughput. Download Spec Sheet 3 GHz Licensed PMP 450i Access Point Cambium Networks industry-leading 450 platform includes the all new PMP 450i and PTP 450i radios. The PMP 450i Access Point product platform is the most scalable industrial-grade wireless broadband solution available. Download Spec Sheet PMP 450 Subscriber Module Now available in most popular global bands, 2.4, 3.5, 3.65, and 5 GHz, the PMP 450 Subscriber Module (SM) supports tiered service models. Software defined upgrades allow throughput from 4 Mbps to over 100 Mbps to improve revenue optimization. Download Spec Sheet PMP 450i Connectorized Module The ultra-wide band 450i features dynamic interference filtering, IP-66/67 enclosure, and multifunction AUX port. It is available as Subscriber Module, Backhaul or Access Point. Download Spec Sheet PMP 450i High Gain Integrated Subscriber The ultra-wide band 450i features dynamic interference filtering, IP-66/67 enclosure, and multifunction AUX port. Extend product range with the integrated high gain panel antenna. PMP 450m with cnMedusa™ Massive MU-MIMO One AP device changes everything. PMP 450m delivers ground-breaking spectral efficiency in a highly integrated package, while being managed from a single pane of glass in the cloud. Download Spec Sheet 3GHz Download Spec Sheet 5 GHz PMP 450 - High Performance and Synchronization for Access and Backhaul The Cambium Networks 450 leads the wireless access network platform industry. Available in Point-to-Multipoint and Point-to-Point options, the 450 platform is optimized for rate, reach, reliability and throughput. Download Spec Sheet 4.9 GHz Public safety PMP 450i Access Point Cambium Networks industry-leading 450 platform includes the all new PMP 450i and PTP 450i radios. The PMP 450i Access Point product platform is the most scalable industrial-grade wireless broadband solution available. Download Spec Sheet PMP 450b The PMP 450b Subscriber Module supports frequencies from 4.9 – 5.925 GHz and provides 300 Mbps aggregate throughput in a 40 MHz channel. Download Spec Sheet PMP 450i Connectorized Module The ultra-wide band 450i features dynamic interference filtering, IP-66/67 enclosure, and multifunction AUX port. It is available as Subscriber Module, Backhaul or Access Point. Download Spec Sheet PMP 450i High Gain Integrated Subscriber The ultra-wide band 450i features dynamic interference filtering, IP-66/67 enclosure, and multifunction AUX port. Extend product range with the integrated high gain panel antenna. Sub 6 Unlicensed PMP 450i Access Point Cambium Networks industry-leading 450 platform includes the all new PMP 450i and PTP 450i radios. The PMP 450i Access Point product platform is the most scalable industrial-grade wireless broadband solution available. Download Spec Sheet PMP 450 Access Point Available in 2.4, 3.5, and 3.65 GHz, the PMP 450 Access Point (AP) delivers consistent and exceptionally high throughput – more than 200 Mbps per sector and more than 1 Gbps per tower. Download Spec Sheet PMP 450b The PMP 450b Subscriber Module supports frequencies from 4.9 – 5.925 GHz and provides 300 Mbps aggregate throughput in a 40 MHz channel. Download Spec Sheet PMP 450 Subscriber Module Now available in most popular global bands, 2.4, 3.5, 3.65, and 5 GHz, the PMP 450 Subscriber Module (SM) supports tiered service models. Software defined upgrades allow throughput from 4 Mbps to over 100 Mbps to improve revenue optimization. Download Spec Sheet PMP 450d Integrated Subscriber Module Dish PMP 450d features a 25 dBi integrated dish in a new, rugged design. PMP 450d is easy to assemble and deploy, and works with existing power supplies. Download Spec Sheet PMP 450i Connectorized Module The ultra-wide band 450i features dynamic interference filtering, IP-66/67 enclosure, and multifunction AUX port. It is available as Subscriber Module, Backhaul or Access Point. Download Spec Sheet PMP 450i High Gain Integrated Subscriber The ultra-wide band 450i features dynamic interference filtering, IP-66/67 enclosure, and multifunction AUX port. Extend product range with the integrated high gain panel antenna. 450i ATEX / HAZLOC The ultra-wide band PMP 450i ATEX/HAZLOC platform features dynamic interference filtering, IP-66/67 enclosure, and multifunction AUX port. Advanced radio design improves transmit power and increases receive sensitivity. Now available for Hazardous Location deployments. PMP 450m with cnMedusa™ Massive MU-MIMO One AP device changes everything. PMP 450m delivers ground-breaking spectral efficiency in a highly integrated package, while being managed from a single pane of glass in the cloud. Download Spec Sheet 3GHz Download Spec Sheet 5 GHz ePMP™ 2000 So long, interference. Interference is the only constant in wireless networking technology, so we built ePMP 2000 to deliver peak performance despite even the noisiest real-world environments. PMP 450 – High Performance and Synchronization for Access and Backhaul The Cambium Networks 450 leads the wireless access network platform industry. Available in Point-to-Multipoint and Point-to-Point options, the 450 platform is optimized for rate, reach, reliability and throughput. Download Spec Sheet Saia Communications, Inc. is Your Infrastructure Partner We Make Cellular Work at Your Site or Venue Our solutions connect people and their wireless devices, so they are productive, safe, and happy. If you need robust wireless coverage and capacity, get in touch with one of our signal experts who can educate you on your options for your best solution.
