CLINICAL & SENSITIVITY

DEPARTMENT OF LAB SERVICES

Nature of the specimen : Urine

Organism isolated : Enterobacter Species

Colony Count : 1.00,000 CFU/mL

Sensitivity : Amikacin, Ceftriaxone, Ciprofloxacin, Imipenem, Ceftazidime, Cefoperazone, Cefepime, Co-trimoxazole, Ofloxacin, Piperacillin-tazobactam, Cephalexin, Cefotaxime, Sparfloxacin, Gatifloxacin, Tobramycin, Norfloxacin, Gentamicin

Resistant : Lomefloxacin, Netilmicin, Cefadroxil, Cefuroxime, Nalidixic acid

REPORTING OF NEGATIVE URINE CULTURES

Negative culture results showing no bacterial growth are available after 24 hours. Positive results require 24-72 hours to complete identification of the number and type of bacteria found.

Primary urine collection container requirements:

- Allow for ease of collection, ease of sampling, appropriate for uropathogen detection
- For patient convenience, have a wide opening and base to avoid accidental spills
- Be equipped with an air tight, secure cap to prevent leakage or contamination
- Hold 50 mL minimal volume

Sterile containers are required for C&S

Non-sterile collections should be tested within 2 hours or refrigerated at 2-8°C
