Decorate your home with free graphics and background images inspired by influential women who have designed this story, as well as widespread interactions with pregnant SIMS! Watch Sims Freeplay on Facebook, Twitter and Instagram and get more information! I really love free game! So exciting. However, it has three main problems and disappointment is that this amazing game reduces a bit. Well, here are my accusations . . If you are on the expedition, some of the activities you have to do can take hours! I know that you can use these yellow gems for fast end, and sometimes Osiris ends them, but sometimes only yellow jewelry is rare. You also have to pay for you if you want to end it really fast, but the money is still unnecessary. If you could speed up, you wouldn't have time to do this task and would be much easier to count than a second, minutes or hours! And my second problem is that girls have only short hair! I have long hair, my friends have long hair and so many people have long hair! You can also give boys the opportunity to have long hair because some young have long hair! In addition, negotiations with all your Sims can be stunning! I also have it on my computer and we can simply take care of the SIM and others can take care of themselves. It is difficult if all your Sims are in the red zone and you don't know who you should help. It would be easier to take care of the SIM card and don't worry about others! Otherwise, this game in my family is a great hit! Thanks a lot! Hello! Above all, I love this game! For example, determine alarms for tasks, etc. I am full of student to do it, I am sure that many older, younger and most people cannot. My biggest question, which has qualified me since the introduction of my neighbors, is just like visiting the city 1), ending in the competition center and says it is a different hobby and lasts 5 hours if I have not found the competition) or 3rd) We assume that the competition has ended (which has not happened) and lasts more than 24 hours. That another will appear. Besides, the last ten years have been exciting! I want teenagers and small children to have more hobbiesCollection objects for LP and XP (crafting, scout, something!). I would also like children to interact with preadolescents and toddlers (who don't have much to be without age) or have other toys, leisure activities, interaction. Another little oddity... During pregnancy, older people cannot give parental advice to other older people. You must be 22 teens, seniors, and adults to complete the 9-day non-upgrade event... give us a break! Thank you for reporting the unfinished crafting activities! Even when I don't finish, I sleep better knowing that I will have the opportunity to finish in the future. I love this game! And I like to see changes in the early days! This is one of the best games I have ever played, 5 stars for me. Some suggestions on what to update. More Sims should be able to join Town Sims, kids should be able to interact with doodollosors and toddlers, and kids should have more missions. Children should also be able to sit on their parents and join adults when swimming in the pool. What does it mean to invest in life jackets. I say that I spend a lot of money on this particular game, we could get better updates from time to time. Autos need to be available so parents can go outside and visit kids at daycare etc. They need to be able to roll once or arrive where Sims can cross legs on the ground. More interesting things to do for preliminary provisions. More than 10 sim cards must be allowed everywhere. When Sims take a nap, they should be able to relax on the couch. Children should also be allowed to join their mother in the same bed. I mean, if you want to play a realistic game, upgrade it. The price of the bar should be a little lower if you don't offer a promotion. Almost everything is expensive! Even though it needs updating, I love this game. I have set an alarm to skip any mission, especially when I deposit money here.
