UNIVERSITY OF LIMERICK

DESIGNING THE FUTURE

UNIVERSITY OF LIMERICK

CAMPUS SECURITY INCIDENT REPORTING PROTOCOL

Objective

The Campus Security Incident Report Form should be used to record details of serious incidents that occur on the UL campus. Examples of serious incidents include activities that result in significant damage to property, physical assault, theft, riotous behaviour or any incident that causes serious distress/disruption to others.

A formal mechanism for reporting of incidents is currently used by campus security staff. However, security staff might not have been requested to attend, or alerted to, all serious incidents that occur on campus. The attached form is intended to address this and it provides a standard procedure for the recording of serious incidents. This process is to be adopted by staff/managers of campus facilities in order to ensure that the University is officially advised, in a timely manner, of all serious incidents that occur on campus.

Submission

Staff/managers are required to complete this form within 24 hours of the occurrence of a serious incident. Hard copies of this form to be submitted as soon as possible to UL Security (Visitors Car Park) where it will be logged and circulated to the relevant personnel for information and/or action.

Electronic copies of this form should be to be sent to: UniversitySecurity@UL.ie

In addition to the above all incidents resulting in accidents involving injury to people or dangerous occurrences (i.e. near - misses) should also be reported to the UL Health and Safety Department.

My rule of thumb is measure, measure, measure before you cut! Now let's put all this information to work! Supplies Step 1 - Size the Design Using a Template **This post focuses on using Cricut Design Space, but everything applies equally well to Silhouette Studio. The very first shirt I made was definitely a learning experience and my sizing was WAY off. Personally I do 2 inches below for small and medium adult sizes, 2.5 inches below for large and X-large adults sizes, and 3 inches below for 2X-large and above sizes. If you have any questions or suggestions, let us know in the comments below or on Facebook! Tips for Using Silhouette Studio If you are using the Silhouette Studio, there are a few extra steps to create mock-ups, but it is still easy. Introduction Hey there Rozzy Crafters! Have you been stressing over what size your t-shirt design should be when you have multiple sizes to make? Make the cuts you will need for your first shirt. The height will adjust accordingly if the design is locked. A Choose the style and size of the desired shirt (it only goes up to 2XL on the size options, but the Custom4x4x4 option can be used for shirts larger than 2XL). A Once you are happy with your design, you can take a screen shot of the 4x4x4 mock-up and send it to your customer for final approval before cutting your vinyl. Right click and copy the image. First, pick the color of your desired shirt.
